

2021 TWENTY-NINTH PROFESSIONAL SEMINAR

VIDEO PRESENTATIONS

Many of the presentations given at this seminar were preserved as video files. To view these presentations, and several interviews that were done during and after the seminar, click on the links in the Details section below.

2021 TMI Professional Conference and Seminar Keynote Address: Telepathic Savants: What do they say about how brains might really function? - Dr. Diane Henneey Powell (1:25:44)

Dr. Powell's talk, Telepathic Savants: What do they say about how brains might really function? begins with an overview of why autistic children and adults might be more likely than neurotypical humans to have an increased experience and expression of psychic abilities, such as telepathy and precognition. She then presents findings from controlled experiments with three autistic children who appear to be highly telepathic. The last segment contains a radical theory of how brains might navigate an informational field similar to the "cloud" we access with our electronic devices. This theory would offer a means for not only explaining psychic abilities, but it would also help solve mysteries in clinical neuropsychology such as savant syndrome, acquired savant syndrome, and the surprisingly high IQ of some people who are born with hydrocephalus and have very little brain tissue.

2021 TMI Professional Conference and Seminar: How I Became Remote Viewer 001 - Joe McMoneagle

A world-renowned remote viewer and peerless raconteur, Joe McMoneagle reveals the fascinating series of life events that led him to become a Remote Viewer for the US Army in How I Became Remote Viewer 001.

2021 TMI Professional Conference and Seminar: Messages from Sanaya - Suzanne Giesemann, MPA

Join Suzanne Giesemann for Messages from Sanaya, a special session in which she connects with Sanaya, a collective consciousness of advanced teachers in spirit. Suzanne describes the process known as attunement or channeling and how she enters into this deep state of expanded awareness to bring through the words of Sanaya.

2021 TMI Professional Conference and Seminar: Superconscious: The Brainwaves of Extraordinary States - Judith Pennington

What do extraordinary states of awareness look like inside the brain? See for yourself in "The Brainwaves of Extraordinary States." The Mind Mirror EEG is used to map the brain-wave patterns of remote viewers and out-of-body travelers listening to Monroe audio technology during the research-oriented Discovery program. Hear about their superordinary experiences in higher states of consciousness—and how they got there.

2021 TMI Professional Conference and Seminar: The Forever Angels: Near-Death Experiences in Childhood and Their Lifelong Impact - PMH Atwater, LHD, PhD (Hon.)

The Forever Angels is a major study of near-death experiences with the newly born, babies, toddlers and children up to age five. NDE expert PMH Atwater reveals how those who experience a near-death state or other worlds at a very young age are profoundly affected for the rest of their lives, including developing psychic and intuitive abilities, intelligence, and "wisdom beyond their years," plus a pervasive feeling of being homesick for heaven." Drawing on interviews with nearly 400 childhood experiencers, both fully matured and young, she explores their accounts of what it is like to be alive on the other side of death, as well as what makes them different from others.

2021 TMI Professional Conference and Seminar: Monroe Research Perspectives - Ross Dunseath, PhD (50:33)

In his Monroe Research Perspectives presentation, Ross Dunseath, PhD, gives an overview of the active research projects at Monroe. Included are details of data acquired in the Copper Wall Room in 2019 through early 2020 and a photo tour of the new Psychomanteum facility at the Robert Monroe Retreat center.

2021 TMI Professional Conference and Seminar: Can Theta and Delta Frequencies Positively Affect Post-Deployment Health? - MeLisa Gantt, PhD

Stress and sleep disturbances are two of the most common issues among service members returning from deployment. This three-phase study assesses the efficacy of binaural beats (theta and delta frequencies) on heart rate variability and sleep quality. In Phase I, 74 service members with complaint of post-deployment stress were randomized to either listen to music embedded with binaural beats (theta frequency) or music alone. Each group listened to their respective intervention throughout the night for at least three consecutive nights per week for four weeks. A 20-minute pre- and post-intervention heart rate variability (HRV) stress test along with perceived stress and sleep diaries assessed intervention efficacy. 167 military healthcare beneficiaries participating in Phase II and III used randomized crossover methods to compare music only to music embedded with binaural

beats (delta frequency) to binaural beat (delta frequency) tones alone. Objective and subjective sleep quality measures assess intervention efficacy. It is hypothesized that binaural beats tones alone and music embedded with binaural beats will show similar positive results when compared to baseline and music alone.

2021 TMI Professional Conference and Seminar: TMI Explorers Tape Program: Looking at "The Friends" as channeled by IMEC in 1989-1992 - Dan Erickson, MS (CIS)

Begun more than 50 years ago by Robert A. Monroe, the Explorer Program, as it's now called, was initiated to tap into nonphysical wisdom. A cadre of individuals, custom-guided by Bob's voice and his early sound technologies, were found to be skilled and talented "explorers." Each session was recorded onto tape. Recently, a large cache of tapes was rediscovered and is being digitized and posted to our archives by Susan Smily, Monroe archivist. Susan and a team of volunteers are currently compiling, transcribing, analyzing and curating these recordings. Dan Erickson, one of the Explorer volunteer team, is involved in the analysis of audio tapes, circa 1984 through 1992, focusing on the work of explorer IMEC. His presentation showcases a summary of over 200 tapes of the Friends material. "The Friends" are an intelligent energy which exist outside of the physical universe. Their purpose in making contact is to explain how to transcend the physical plane of existence.

2021 TMI Professional Conference and Seminar: Miracles Happen! Sound Technology Helps Manifest These Miracles - Brian Dailey, MD & Allyn Evans, MBA

Over the course of their careers, Brian Dailey and Allyn Evans have witnessed miraculous healing. Join them as they share the magic and demonstrate just how powerful we are.

2021 TMI Professional Conference and Seminar: Research Methodologies - Nancy McLaughlin-Walter, ABD/PhD

Nancy McLaughlin-Walter's talk, Research Methodologies, spotlights field research and data collection for dissemination by the practitioner. She discusses ways in which practitioners may already collect data that helps improve their practice for clients. Then, she expands upon options to hone data collection practice and help ensure that this information can further the work of researchers at Monroe to improve materials and techniques.

2021 TMI Professional Conference and Seminar: Tour of the Archives – Susan Smily

2021 TMI Professional Conference and Seminar: Paul Citarella

2021 TMI Professional Conference and Seminar: Carol Monroe & Mark Crewson - OT & LCN

2021 TMI Professional Conference and Seminar: Board Report

2021 TMI Professional Conference and Seminar: Monroe Research Perspectives - Ross Dunseath, PhD

2021 Professional Seminar Interview - Allison Moore

2021 Professional Seminar Interview - Becky Carroll

2021 Professional Seminar Interview - Charleene Nicely

2021 Professional Seminar Interview - Denise Tiexiera

2021 Professional Seminar Interview - Dolly Lopez

2021 Professional Seminar Interview - Jay Taylor

2021 Professional Seminar Interview - Jim Lane

2021 Professional Seminar Interview - Lisle Jackson

2021 Professional Seminar Interview - Nabil

2021 Professional Seminar Interview - Domenik

2021 Professional Seminar Interview - Ross Dunseath

2021 Professional Seminar Interview - Susan Smily

2021 Professional Seminar Interview – Paul Citarella
